SUMMARY

I am a proactive and self-motivated full-stack software developer with over 7 years of experience in creating and optimizing web applications. My expertise includes working with Ruby on Rails, React and I have a strong background in collaborating with cross-functional teams to deliver efficient and high-quality solutions. I am passionate about leveraging technology to solve complex business challenges.

EDUCATION

University of Engineering & Management - Jaipur

Bachelor of Technology in Electronics and Communication Engineering - 73.25

July 2013 - June 2017

WORK EXPERIENCE

Kreeti Technologies Pvt. Ltd.

Web Engineer

September 2017 - June 2020

- Spearheaded the development of custom applications using Ruby on Rails and React, driving a 30% improvement in operational efficiency through automation.
- Achieved a 240% reduction in load times by refactoring code and implementing advanced performance optimization techniques.
- Enhanced mobile responsiveness and implemented role-based access control, contributing to a 21% increase in user engagement.

Involio LLC

Rails Engineer

July 2020 - June 2021

- Worked as a Rails developer, delivering key features in very tight deadline and 200+ bug fixes.
- Successfully optimized application performance, achieving a 78% improvement in speed and efficiency, ensuring a seamless user experience.

Cisco Systems (India) Private Limited

Software Engineer

July 2021 - Present

- Successfully built multiple prototypes as proof of concept (POC) within tight deadlines, with 100% success in transitioning projects to production.
- Contributed to the end-to-end software lifecycle of 4+ projects, with 3 currently live and delivering value.
- Collaborated with cross-functional teams to enhance application quality, ensuring continuous improvement and optimal delivery.

PROJECTS

GPS based smart spy surveillance robotic system

Fall 2016

Developed a GPS-based surveillance robotic system using Raspberry Pi for security applications, integrating wireless control via web browser and Android apps. Implemented camera, gripper, ultrasonic sensor, and GPS module for real-time environment monitoring and location tracking.

SKILLS

Backend: Ruby on Rails, RESTful API, PostgreSQL, RSpec, MySQL, NodeJS, Redis, Sidekiq

Frontend: ReactJS, HTML, CSS, JavaScript, SASS, Tailwind, Bootstrap

DevOps: CI/CD using CircleCI and GitHub Action, AWS, Git

Tools: Slack, Jira, Datadog, CircleCI, GitHub
